

the resort is still in the planning/development stage, the page should communicate:

Vision → Project Plan → Business Potential → Investment Model → Investor Confidence → Lead/Consultation

The goal is **“Understand the Project and Explore the Investment Opportunity.”**

Recommended Positioning:

Sunvia Hotel & Resort

A Planned Hospitality Destination. An Investment Opportunity in the Making.

A premium hotel & resort project by Sun Tourism Ltd., planned in Manikganj with hotel accommodation, villas, dining, events, recreation and hospitality facilities.

Primary CTA:

Explore Investment Opportunity

Secondary CTA:

Request Project Details

And perhaps a WhatsApp button:

Talk to Investment Team

Recommended Website Flow — Investor First

Project Vision

- **Why This Project Is Being Developed**
- **Master Plan**
- **Planned Facilities**
- **Potential Customer Demand**
- **Potential Revenue Sources**
- **Investment Opportunity**
- **Share & Payment Structure**
- **How Profit Distribution Works**
- **Development Plan**
- **Investor Process**
- **Terms / Risks / FAQ**
- **Contact Investment Team**

That is a much better structure for your current stage.

1. Hero Section

Don't show hotel-booking language.

Use a high-quality architectural/master-plan visualization.

Main Headline

SUNVIA HOTEL & RESORT

Supporting Headline

Building a New Hospitality Destination in Manikganj

Then:

Explore an opportunity to participate in the planned development and future business operations of Sunvia Hotel & Resort.

Buttons:

Explore Investment Opportunity

Download Project Profile

Underneath, show a compact project summary:

50 Bigha Planned Development

2 Hotel Blocks — G+7

Approx. 140 Hotel Keys

10 Private Villas

Multiple Hospitality Revenue Streams

This immediately tells the investor:

এটা ছোট কোনো resort project না।

2. Project Vision

Headline:

The Vision Behind Sunvia Hotel & Resort

Explain what Sunvia wants to build.

Something like:

Sunvia Hotel & Resort is being planned as a comprehensive hospitality destination combining accommodation, dining, events, recreation and premium guest experiences within one integrated project.

Then visually show:

Stay

Dine

Meet

Celebrate

Relax

Experience

Here you are not claiming these facilities currently exist.

Always use words such as:

Planned

Proposed

Designed

Future

Subject to final design

where appropriate.

That is important for credibility.

3. Master Plan

This should probably be the most important visual section.

Headline:

Explore the Planned Resort

Use the actual master-plan drawing.

Mark:

- Hotel Block A
- Hotel Block B

- Private Villas
- Presidential / VIP Villa
- Swimming Pool
- Central Landscape
- Restaurants
- Event Area
- Conference Facilities
- Recreation
- Helipad
- Service Facilities
- Engineering Utilities
- Main Entrance
- VIP Entrance
- Service Entrance
- Parking

Clicking a location can show:

Hotel Block A

Planned G+7 hotel building forming part of the project's primary accommodation inventory.

This makes the development feel tangible.

4. Why This Resort Is Being Developed

This replaces the guest-facing section I suggested earlier.

Instead of:

Why should you visit?

use:

Why We See an Opportunity in Hospitality

Now explain the demand thesis.

For example:

Weekend Leisure

Potential demand from families and groups looking for short-distance leisure experiences.

Corporate Events

Potential demand from companies for meetings, training, conferences and retreats.

Weddings & Social Events

Events can create demand for venues, catering, accommodation and other services.

Hotel Accommodation

Future room inventory creates the core hospitality business.

Food & Dining

Restaurants and event catering can become additional operating revenue sources.

Recreation

Pool, outdoor activities and resort facilities can support day visitors and staying guests.

Notice the language:

potential, planned, can, future

not:

will definitely generate profit.

5. “How the Business Is Planned to Work”

This is where your page becomes different from normal real-estate investment pages.

Headline:

From Resort Activity to Business Revenue

Use a diagram:

Guests / Visitors / Events

↓

Sunvia Hotel & Resort

↓

Accommodation

Dining

Events

Recreation

Guest Services

Other Operations

Total Resort Revenue

This explains that investment is connected to a **business operation**, not only construction.

6. Potential Revenue Sources

Make this a major infographic.

Headline:

Potential Revenue Sources

Use six cards:

Hotel Rooms

Accommodation revenue

Food & Restaurant

Restaurants, catering and dining

Conference & Events

Corporate, wedding and social events

Swimming Pool & Recreation

Planned recreational services

Guest Services

Additional hospitality services

Other Operating Income

Other eligible resort operating activities

Then show:

Multiple Activities. One Resort Business.

That is a strong investment story without promising a return.

7. Investment Opportunity

Now introduce the actual product.

Headline:

Investment Opportunity at Sunvia Hotel & Resort

Supporting copy:

An opportunity to participate in the future business potential of the planned Sunvia Hotel & Resort under the applicable investment terms and conditions.

Then show the investment details clearly.

Investment Snapshot

Item	Details
Investment Product	Sunvia Hotel & Resort Share
Current Share Price	Tk 360,000
Booking Money	Tk 20,000
Payment Option	Full Payment / 36-Month Installment
Profit Distribution	Based on distributable resort profit
Distribution Cycle	Yearly
Return	Not Guaranteed

This is where clarity matters more than fancy marketing.

8. Explain What the Investor Is Actually Buying

This section is critical.

Headline:

Understand Your Investment

You should explicitly explain:

The investor is purchasing a Sunvia Hotel & Resort investment share under the applicable agreement and is not becoming a shareholder of Sun Tourism Ltd.

Then use a diagram:

Investor

↓

Sunvia Hotel & Resort Share

↓

Resort Business Performance

↓

Eligible Resort Revenue

↓

Operating Expenses

↓

Applicable Costs / Reserves

↓

Distributable Profit

↓

Investor Distribution

This should remove a large amount of confusion from the sales process.

9. How Profit Distribution Works

Headline:

How Potential Profit Is Determined

Show this calculation prominently:

Total Resort Revenue

– Operating Expenses

– Applicable Costs

– Applicable Reserves

= Distributable Profit

Then:

Eligible investor distributions will be determined from the distributable profit in accordance with the applicable terms.

And underneath:

Returns are not fixed or guaranteed and depend on actual resort business performance.

I would make this one of the trust sections rather than hiding it.

10. Investment Example — Payment Only

You can show a simple example:

1 Share

Share Value

Tk 360,000

Booking

Tk 20,000

Remaining

Tk 340,000

Installment Period

36 months

But I would **not show expected yearly income** yet unless you later have a formally approved feasibility study.

For example, avoid:

Expected 15% ROI

unless there is a documented basis and management has approved that communication.

11. Development Roadmap

Very important for an early-stage investment.

Headline:

From Planning to Operation

Create a horizontal timeline.

01

Planning & Concept

02

Architectural & Engineering Design

03

Site Development

04

Construction

05

Interior & Hospitality Setup

06

Recruitment & Pre-Opening

07

Resort Operation

08

Revenue Generation & Profit Distribution

This tells the investor:

টাকা দিলাম—এরপর কী হবে?

12. Current Project Status

I strongly recommend showing this.

Headline:

Where the Project Stands Today

Example:

Current Stage: Planning & Development Preparation

Then show completed/in-progress milestones.

For example:

Project Concept — Completed

Initial Master Planning — Completed / In Progress

Architectural Planning — In Progress

Development Preparation — In Progress

Avoid showing exaggerated progress bars such as **65% complete** unless you have a measurable definition of completion.

13. Investor Benefits — But Keep Them Factual

Instead of:

Why Invest?

I would use:

Key Features of the Investment Model

Then:

Hospitality Business Exposure

Investment is associated with a planned operating resort business.

Multiple Potential Revenue Sources

The proposed model includes accommodation, dining, events, recreation and other operating activities.

Flexible Payment Structure

Full payment and installment arrangements.

Yearly Distribution Framework

Distribution based on actual eligible distributable profit.

Transfer Framework

Subject to applicable company terms.

Project Updates

Investors can receive development and business updates.

This is safer and more professional than using words such as:

Best Investment

Highly Profitable

Guaranteed Investment

14. “Why Sunvia?” Trust Section

Investors are not just investing in the building.

They are investing based on confidence in the people behind it.

Create:

The People Behind the Project

Show:

Sunvia Group

Sun Tourism Ltd.

Sunvia Hotel & Resort

Then explain the structure clearly.

You can later include:

- Board / management
- Company profile
- Experience
- Sister concerns
- Project-development team
- Hospitality consultants
- Architects
- Engineers

Only list consultants/operators after they are formally engaged.

15. Investor Documents

This is extremely important.

Headline:

Review Before You Invest

Buttons/cards:

Project Profile

Master Plan

Investment Terms

Payment Schedule

Transfer & Exit Terms

Frequently Asked Questions

Application Form

Eventually:

Development Reports

Financial Reports

Operational Reports

The site should encourage:

Understand first. Invest after reviewing the information.

That actually improves trust.

16. Investor Journey

Headline:

Your Investment Journey

Keep it simple:

01

Explore the Project

02

Request Investment Information

03

Speak With Our Investment Team

04

Review Documents & Terms

05

Complete Application

06

Pay Booking Amount

07

Complete Agreement

08

Continue Payment Plan

09

Receive Project Updates

10

Participate in Future Eligible Profit Distribution

That makes the process feel controlled and professional.

17. Lead Generation Form

This page should primarily generate qualified investor leads.

Form fields:

Name

Mobile Number

WhatsApp Number

Email

Investment Interest

Dropdown:

1 Share

2–3 Shares

4–5 Shares

5+ Shares

Then:

Preferred Contact

WhatsApp / Phone / Meeting

CTA:

Request Investment Details

After submission:

Thank you for your interest in Sunvia Hotel & Resort. Our investment team will contact you with the project profile, investment terms and next steps.

18. WhatsApp Funnel

Since your sales process is consultation-based, WhatsApp should be prominent.

Button:

Discuss Investment on WhatsApp

Pre-filled message:

Hello, I would like to know more about the investment opportunity at Sunvia Hotel & Resort. Please share the project and investment details.

That is better than:

Buy Share Now

19. FAQ — Investor Focused Only

For the current website, your FAQ should mostly address investors.

Examples:

Sunvia Hotel & Resort কী ধরনের প্রকল্প?

প্রকল্পটি এখন কোন পর্যায়ে আছে?

একটি Share-এর মূল্য কত?

Booking Money কত?

Installment কত মাসের?

Investor কি Sun Tourism Ltd.-এর shareholder হবেন?

Profit কোথা থেকে আসবে?

Profit কীভাবে calculate করা হবে?

Profit guaranteed কি না?

Loss হলে কী হবে?

Share transfer করা যাবে কি?

Installment অবস্থায় exit করা যাবে কি?

Project completion timeline কী?

Investor কীভাবে project update পাবেন?

The Homepage Message Should Change Too

Because the resort isn't operating yet, don't create confusion by showing:

Book Resort

or

Experience Our Resort

Instead, on the main Sun Tourism website, use a project card:

Sunvia Hotel & Resort

Our upcoming hospitality development in Manikganj.

Explore the Project & Investment Opportunity →

That takes users directly to the investment landing page.

Recommended Menu Structure Right Now

I would use:

Home

Visa

Tour

Ticket

Sunvia Hotel & Resort

Contact

Inside **Sunvia Hotel & Resort**:

Project Overview

Master Plan

Investment Opportunity

Development Updates

Investor FAQ

Future Website Transition

What you're doing now is effectively:

Phase 1 — Investment Website

2026 → Development Stage

Primary audience:

Investor

Primary CTA:

Explore Investment

Later:

Phase 2 — Development Website

Audience:

Investor + Public

Primary content:

Construction updates, facilities, progress, pre-opening.

And when the resort becomes operational:

Phase 3 — Hospitality Website

Audience:

Guests + Corporate + Event Customers + Investors

Navigation can then become:

Stay | Villas | Dining | Events | Experiences | Offers | Book Now

while the investor section remains under:

Investor Relations

So you do **not need to design today's website as if the resort already exists**. Design it specifically around the current business stage.

The core story I recommend for Sunvia right now is:

We are building the destination → This is what we plan to build → This is the demand we aim to serve → These are the potential revenue activities → This is how the business model works → This is how you can participate as an investor.
